# VIDEO MEETINGS JUST GOT A LOT BETTER

## Logitech Rally and Rally Plus

Logitech Rally delivers studio-quality video, unmatched voice clarity, and RightSense™ automation for more natural meetings with most any software-based video conferencing service.

Rally and Rally Plus come equipped with Ultra-HD video, modular audio components, and RightSense™

automation: RightLight™ for automatic facial luminance and color optimization, RightSound™ for automatic audio calibration, and RightSight™ for proactive camera control.

Rally includes a camera, table and display hubs that minimize cross-room cabling, one speaker and one mic pod.

Rally Plus adds a second speaker, a second mic pod. Additional mic pods are available for custom installations. Complimentary support is included with all Rally products.

With its sleek design, premium materials, and unequalled capability, the Rally portfolio raises the bar for USB-connected conference camera systems.

# Logitech Rally and Rally Plus

## FEATURES AND BENEFITS

### Advanced optics

Rally sets a new benchmark for USB-connected cameras. With whisper quiet mechanical Pan/Tilt/Zoom, razor-sharp 15X HD room, expansive 90 degree field of view, and powerful 4K sensor, Rally Camera captures every person in the room with truly phenomenal video quality.

### Premium design

With a sleek, understated design and high-end materials, Rally is suitable for boardrooms, classrooms, and custom installations. The camera's nearly-silent PTZ lens movement allows participants to focus on the meeting rather than the technology.

### Easy setup and cabling

Integrated cable management provides a clean installation for virtually any room configuration. Plug-and-play via USB ensures simple connections to conference room computers and nothing complex to slow user adoption.

### Firmware upgradeable

Firmware tool makes it easy to apply the latest features and enhancements.

### RightSense™ automation

Featuring RightLight™ for automatic light balance and color optimization and RightSight™ for automatic framing, Rally Camera delivers beautiful, studio-quality video with optimal framing for every participant. RightSound™ calibrates automatically to audio factors in the room.

### Premium Logitech-engineered glass lens

Large, light-gathering lens meets the highest optical standards, providing exceptional sharpness, color, speed, and resolution.

### Beamforming microphones

Individual mic pods contain multiple beamforming elements that focus on active speakers while automatically eliminating acoustic distractions. Up to seven mic pods can work together, creating a beamforming mesh for every seating position throughout large meeting spaces.

### Privacy assurance

When Rally Camera is not in use, the lens defaults to a parked position where the lens is pointed straight down.

### Three camera presets

Define up to three preset locations (presets 1, 2, and Home) for the camera view and return to any of them with the push of a button on the remote control.

### Plug-and-play USB connectivity

Easily connects to PC, Mac® and Chrome™ devices with no additional software required.

### Works with most video conferencing applications

Compatible with virtually any video conferencing software app, including the ones you already use.

### Front of room audio

Rally speakers align voices with video at the front of the room. Use a second speaker to expand the soundstage for larger rooms.

## SYSTEM REQUIREMENTS

### Operating Systems

Windows® 7, Windows 8.1 or Windows 10  
Mac OS X® 10.10 or higher  
Chrome OS

### Resolutions higher than 1080p

Windows 8.1 or higher or MacOS 10.10 or higher  
USB 3.0 port and Type C cable  
Compatible software

## WARRANTY

2-year limited hardware

## IN THE BOX
